The information in this table shows the minimum required for a job well done. Anything above this level means improved stability for the whole.

(1) Once compacted, a 1" bed will be reduced down to 5/8".

(2) For certain areas where clay soil is unstable, the minimum excavation required is 24" and the minimum foundation is 525" 21".

(3) Conforms to the recommended ICPI standards (Interlocking Concrete Pavement Institute).
